

CREW[™] High Gloss Marble Polish

High Gloss Marble Polish

Description

Crew[®] High Gloss Marble Polish a product used for wet crystallization and protection of calcareous stone floors.

Features and benefits

- Quickly achieves a mirror-like shine thanks to a combined chemical and mechanical action
- Reduces water and dirt penetrability, thus facilitating daily cleaning and maintenance.
- Increases contour acuity and intensifies the natural appearance of the stone
- Significantly improves slip-resistance

Directions for use

Dosages /Dilution : Make the solution with 3 parts of powder and 2 parts of water. Slowly add the water to the powder and shake the mixture to a homogeneous paste. Please ensure that the paste is shaken vigorously to ensure smooth dispersion. When the paste has to be applied on the surface, shake the mixture adequately so that the crystals don't settle down and are adequately spread over the floor.

Application : If the floor has visible scratches, hone the surface using 400 grit diamond pad for 2 mins per sqm and followed by 1800 or 2000 grit diamond pad for 5 mins per sqm before subjecting to the crystallisation. Use 1 % neutral cleaner solution and clean the surface using single disc machine with red pad and then vacuum it. Ensure proper rinsing with water to remove all dirt particles.

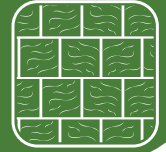

Damp the floor using wet mopping. Ensure it is just moist and no excess water on floor. It is extremely important to have the floor slightly moist before the application of High Gloss Marble Polish. Spread the paste in the center of the application area. Place a 165 RPM single disc machine, fitted with a red pad, directly on top of the paste. Begin spreading the paste equally over the entire area to be treated. Buff for 3-4 mins per m². Do not allow the paste to dry. Sprinkle a little water whenever required to maintain a creamy paste.

At the end of crystallisation, dilute the slurry with fresh water, pick it up with a wet vacuum cleaner. Flood and agitate the section thoroughly with plenty of neutral cleaner solution to ensure complete product rinse-off. Remove the solution with a wet vacuum cleaner. After the floor dries completely, dry buff with ed with a soft white pad.

CREW[™] High Gloss Marble Polish

High Gloss Marble Polish

Technical data

Appearance	Yellow, free flowing powder
Bulk Density @ 20°C	0.92 - 0.96
pH-value (66%) solution	2.0 - 3.5

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Store in original closed containers, away from extremes of temperatures. Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

Precautions

For scratched surfaces, grinding is recommended before the crystallization. Use only on calcareous stone floors, e.g. marble, travertine. Protect other surfaces from splashes. Use paste immediately after preparation. Keep container tightly closed.
